Re: Facility Name: Ocean County Landfill Corporation (OCLC)
Facility Address: 2498 State Hwy 70, Manchester, Ocean County, NJ 08759
Facility Program Interest No.: 78931, Permit Activity No.: BOP160002
DRAFT OPERATING PERMIT: SIGNIFICANT MODIFICATION

Dear Mayor Palmer:

I am providing you with this special notification to seek public comment on our intent to approve an Air Pollution Control Operating Permit for the above facility. Any comments on this "draft operating permit" must be in writing and received by the Department by [March 26, 2018](#). Please forward any comments to my attention at the above address.

The public notice, statement of basis and the draft permit will soon be posted on the Department's website: <http://www.state.nj.us/dep/aqpp/publicnotices.htm>.

As this facility is located in your town, we will try to answer any questions you or the town's residents may have. Please contact me at (609) 984-5932 with any questions.

Sincerely,

Eleonora Kats
Eleonora Kats

NOTICE OF OPPORTUNITY FOR PUBLIC COMMENT for OCEAN COUNTY LANDFILL
CORPORATION

DRAFT TITLE V OPERATING PERMIT SIGNIFICANT MODIFICATION

Program Interest (PI): 78931 / Permit Activity Number: BOP160002

The New Jersey State Department of Environmental Protection (NJDEP) is seeking public comment on its intent to approve an air pollution control Operating Permit Significant Modification for this facility pursuant to the provisions of Title V of the Federal Clean Air Act, the federal rules promulgated at 40 CFR 70, and the state regulations promulgated at N.J.A.C. 7:27-22.

FACILITY INFORMATION

Ocean County Landfill Corporation (OCLC) is located at 2498 State Hwy 70, Manchester, Ocean County, NJ 08759. The facility is owned and operated by OCLC.

FACILITY PROCESSES AND AIR EMISSIONS INFORMATION

For information about the facility's processes and their air emissions please refer to the Statement of Basis available on this webpage at <http://www.state.nj.us/dep/agpp/publicnotices.htm>.

PUBLIC COMMENTS AND CONTACT INFORMATION

This public notice, the statement of basis, and the draft permit have been posted at the Department's website: <http://www.state.nj.us/dep/agpp/publicnotices.htm>. The draft permit is also available for inspection at NJDEP/Air Permits, 401 E State Street, Trenton, NJ 08625 and at the Central Regional Field Office located at Mail Code 22-03A, 401 East State Street, PO Box 420, Trenton, NJ 08625-0420, phone (609-292-3187). You may inspect the permit application and any supporting materials at the Trenton location by calling Yogesh Doshi at (609) 633-7249.

All persons, including the applicant, who believe that any condition of the draft Air Pollution Operating Permit or the Department's tentative decision to approve this permit is inappropriate, must raise all reasonable issues of concern and submit all arguments and factual grounds or materials supporting their position during the public comment period. Any comments on this draft permit must be received within thirty days of the date of this notice and addressed to Yogesh Doshi, NJDEP, 401 E State Street, 2nd Floor, PO Box 420, Mail Code 401-02, Trenton, NJ 08625-0420.

In accordance with N.J.A.C. 7:27-22.11(f), any person may request that the Department hold a public hearing on the draft permit. A request for a public hearing shall be submitted, in writing, within thirty days of the date of this notice to the Department at the Trenton address listed above. The request for public hearing shall include a statement of issues to be discussed at the public hearing. The statement of issues shall be relevant to the draft permit under review by the Department.

The Department will consider and respond to all written and timely submitted comments. The applicant, and each person, who submitted written comments, will receive a notice of the Department's final decision regarding the Operating Permit modifications and a copy of the Response to Comment document.

STATEMENT OF BASIS for OCEAN COUNTY LANDFILL CORPORATION

TITLE V OPERATING PERMIT SIGNIFICANT MODIFICATION

Program Interest (PI): 78931 / Permit Activity Number: BOP160002

I. FACILITY INFORMATION

Ocean County Landfill Corporation (OCLC) is located at 2498 State Hwy 70, Manchester, Ocean County, NJ 08759 and consists of an active municipal solid waste landfill. The facility is owned and operated by OCLC.

The facility is classified as a major facility based on its potential to emit 57.4 tons per year of nitrogen oxides.

This permit allows individual hazardous air pollutant to be emitted at a rate to not exceed: 6.48 tons per year of hydrogen chloride, 3.34 tons per year of toluene, 1.02 tons per year of methylene chloride, 0.2 tons per year of tetrachloroethane, 0.2 tons per year of ethylene dichloride, and 0.48 tons per year of vinyl chloride.

II. AREA ATTAINMENT CLASSIFICATION

The Federal Clean Air Act (CAA) sets National Ambient Air Quality Standards (NAAQS) for six common air pollutants. These commonly found air pollutants (also known as "criteria pollutants") are particulate matter, ground-level ozone, carbon monoxide (CO), sulfur dioxide (SO₂), nitrogen dioxide (NO₂), and lead. The US Environmental Protection Agency (USEPA) also classifies areas as "attainment" or "nonattainment" for each criteria pollutant, based on the magnitude of an area's problem. Nonattainment classifications are used to specify what air pollution reduction measures an area must adopt, and when the area must reach attainment. Currently, the entire State of New Jersey is designated as nonattainment for the 8-hour ozone NAAQS. New Jersey is designated attainment for all other pollutants. For nonattainment classification refer to <https://www.epa.gov/green-book/green-book-national-area-and-county-level-multi-pollutant-information>.

III. BACKGROUND AND HISTORY

The equipment that emits air contaminants from this facility include: a municipal solid waste landfill equipped with an active gas collection and control system venting to two enclosed flares CD1 and CD10 and one open flare CD11 with no less than 98% reduction efficiency for volatile organic compound emissions. Also, the landfill includes leachate treatment equipment, two screeners for soil screening and a 250 kW emergency diesel generator.

A Facility-Wide Risk Assessment will be conducted during the next Operating Permit Renewal process.

This Permit Modification includes the following changes:

1. Increase in Landfill Design Capacity. OCLC is requesting to increase the municipal solid waste (MSW) landfill (U64) permitted design capacity from 17.355 million Mg to 20.711 million Mg (U64, OS Summary, Ref. #3). This Design Capacity increase provides capacity for waste placement up to final elevations in Cell 7 Overfill and the Valley Fill. This modification commenced after July 17, 2014, and thus, the landfill is subject to NSPS XXX.

Total permitted cumulative gas flow to the flare system (CD1, CD10 and CD11) will decrease from 3,210 MMscf in any calendar year (i.e. 6,107 scfm) to 3,161 MMscf in any calendar year (i.e. 6,014 scfm) based on the updated inputs to the LANDGEM modeling that include waste placement through 2025. The value of 3,161 MMscf in any calendar year (i.e. 6,014 scfm) is consistent with the values that were submitted by the Ocean County Landfill Corp. (OCLC), PI 78931 as part of the PSD non-applicability analysis for an increased design capacity of the landfill for the combined operation of all sources (landfill and engines) at the site. The permitted annual emissions from Landfill U64 are adjusted per total permitted cumulative gas flow to the flare system.

2. Addressing the Sulfur Dioxide (SO₂) emissions increase from flares. OCLC is proposing to install an H₂S removal system to collect and treat LFG from the Sandy waste contained in portions of Cells 5 and 6, in order to achieve compliance with the SO₂ emission limits specified in Title V operating permit, per the NJDEP Administrative Consent Order dated November 30, 2015. The new H₂S removal system is addressed under an operating scenario U64 OS1.

STATEMENT OF BASIS for OCEAN COUNTY LANDFILL CORPORATION

TITLE V OPERATING PERMIT SIGNIFICANT MODIFICATION

Program Interest (PI): 78931 / Permit Activity Number: BOP160002

3. This permit includes the Potential to Emit (PTE) for PM_{2.5} emissions for landfill U64 that were not accounted previously. The VOC emission rate listed in Permit BOP160001 was corrected based on the OCLC calculations.

4. Simultaneously with this permit BOP160002 for OCLC (PI 78931), the Department is also issuing a Title V permit for MRPC Holdings (PI 78901) that includes the restricted PTE values and restricted gas flow for emission units owned and operated by MRPC Holdings (Six CAT 3516 engines and six CAT 3520 engines) that were consistent with the values that were submitted by the Ocean County Landfill Corp. (OCLC) PI 78931 as part of the PSD non-applicability analysis for an increased design capacity of the landfill for the combined operation of all sources (landfill and engines) at the site.

This permit BOP160002 also includes Potential to Emit for air contaminants for a joint facility: Ocean County Landfill Corp. (OCLC) and MRPC Holdings LLC (MRPC), for which a Title V operating permit will be issued under PI 78931 at a later date. Those PTE are listed in BOP160002 under U64 OS Summary (Ref. #38).

This modification will include the facility-wide emission limits as listed in the following table:

Allowable Emission Limits	Facility's Potential Emissions (tons per year)										
	VOC (total)	NO _x	CO	SO ₂	TSP (total)	Other (total)	PM ₁₀ (total)	PM _{2.5} (total)	Pb	HAPs (total)	CO _{2e} (total)
Proposed Permit	17.28	57.4	92.8	27.3	21.49	6844	18.71	18.71	N/A	11.71	Not Listed

VOC	Volatile Organic Compounds	PM ₁₀	Particulates under 10 microns
NO _x	Nitrogen Oxides	PM _{2.5}	Particulates under 2.5 microns
CO	Carbon Monoxide	Pb	Lead
SO ₂	Sulfur Dioxide	HAPs	Hazardous Air Pollutants
TSP	Total Suspended Particulates	CO _{2e}	Carbon Dioxide equivalent
Other	Any other air contaminant regulated under the Federal Clean Air Act		

IV. CASE-BY-CASE DETERMINATIONS

No case-by-case determinations were required for this modification.

V. EMISSION OFFSET REQUIREMENTS

This modification is not subject to Emission Offset requirements.

VI. BASIS FOR MONITORING AND RECORDKEEPING REQUIREMENTS

The facility's operating permit includes monitoring, recordkeeping and reporting requirements that are sufficient to demonstrate the facility's continued compliance with the applicable requirements consistent with the following:

1. Provisions to implement the testing and monitoring requirements of N.J.A.C. 7:27-22.18, the recordkeeping and reporting requirements of N.J.A.C. 7:27-22.19, and all emissions monitoring and analysis procedures or compliance assurance methods required under the applicable requirements, including any procedures and methods promulgated pursuant to 40 CFR 64; and
2. Where the applicable requirement does not require direct periodic monitoring of emissions, the Department requires periodic monitoring of surrogate parameters sufficient to yield reliable data from the relevant time period that are representative of the facility's compliance with the permit.

Flares:

The facility monitors the fuel use for each flare CD1, CD10, and CD11 as the surrogate for the long-term (TPY) emission limits for VOC, NO_x, CO, SO₂, TSP, PM-10, PM-2.5, and HAPs.

STATEMENT OF BASIS for OCEAN COUNTY LANDFILL CORPORATION

TITLE V OPERATING PERMIT SIGNIFICANT MODIFICATION

Program Interest (PI): 78931 / Permit Activity Number: BOP160002

Surrogate monitoring for the non-methane organic compounds (NMOC) destruction efficiency in the flares is the landfill gas combustion temperature monitoring. Short-term (lb/hr) SO₂ emission limits are monitored by a monthly H₂S sampling prior to combustion and calculations. The open flare CD11 is being monitored for the pilot light or the flame. Also, this permit includes hydrogen sulfide ambient monitoring at or beyond the property line.

3. In some cases, direct periodic monitoring of emissions and/or surrogate parameters is not required due to one or more of the following:
- Equipment size and capacity limitations,
 - Subject equipment being permitted at the maximum rated capacity,
 - There is no specific state or Federal standard that applies to this piece of equipment,
 - Not a pollutant of concern for this piece of equipment,
 - Agreements with EPA on the frequency of testing and monitoring for combustion sources.

VII. APPLICABLE STATE AND FEDERAL RULES

This modification is subject to New Jersey Air Pollution Control Regulations, codified in N.J.A.C. 7:27-1 through 34, as applicable. A complete text of these regulations is available at: <http://www.nj.gov/dep/aqm/rules27.html>

This modification is also subject to Federal regulations listed below.

NSPS Subpart A:	General Provisions
NSPS Subpart IIII:	Stationary Compression Ignition Internal Combustion Engines
NSPS Subpart XXX:	Municipal Solid Waste Landfills
MACT Subpart A:	General Provisions
MACT AAAA	Municipal Solid Waste Landfills

The Greenhouse Gas (GHG) emissions increase from this facility are less than 75,000 TPY CO₂e.

VIII. FACILITY'S COMPLIANCE STATUS

The Responsible Official at the facility has certified that the facility currently meets all applicable requirements of the Federal Clean Air Act and the New Jersey Air Pollution Control Act. Based on this certification, the Department's evaluation of the information included in the facility's application, and a review of the facility's compliance status, the Department has concluded that this air pollution control operating permit should be approved.

This operating permit includes a permit shield, pursuant to the provisions of N.J.A.C. 7:27-22.17. A permit shield provides that compliance with the relevant conditions of the operating permit shall be deemed compliance with the specific applicable requirements that are in effect on the date of issuance of the draft operating permit, and which form the basis for the conditions in the operating permit.

Prior to the expiration of the Operating Permit's five-year term, the facility will be required to apply for a renewal, at which time the Department will evaluate the facility and issue a public notice with its findings.

IX. EXEMPT ACTIVITIES

The facility's operating permit does not include exempt activities such as office and interior maintenance activities, maintenance shop activities, food preparation facilities, cafeterias and dining rooms, etc. A complete list of exempt activities, as allowed by the Operating Permit rule, can be found at N.J.A.C. 7:27-22.1.

FACILITY NAME (FACILITY ID NUMBER)

Air Pollution Control Operating Permit Significant Modification

Permit Activity Number: BOP160002

Program Interest Number: 78931

Mailing Address	Plant Location
LAWRENCE C HESSE PRESIDENT OCEAN CNTY LANDFILL CORP 25 1ST AVE - 2ND FLR Atlantic Highlands, NJ 07716	OCEAN CNTY LANDFILL CORP 2498 Rt 70 Manchester Twp Ocean County

Initial Operating Permit Approval Date: 10/04/2004
Operating Permit Approval Date: DRAFT
Operating Permit Expiration Date: 10/03/2009 (operating under permit shield)

AUTHORITY AND APPLICABILITY

The New Jersey Department of Environmental Protection (Department) approves and issues this Air Pollution Control Operating Permit under the authority of Chapter 106, P.L. 1967 (N.J.S.A. 26:2C-9.2). This permit is issued in accordance with the air pollution control permit provisions promulgated at Title V of the Federal Clean Air Act, 40 CFR 70, Air Pollution Control Act codified at N.J.S.A. 26:2C and New Jersey State regulations promulgated at N.J.A.C. 7:27-22.

The Department approves this operating permit based on the evaluation of the certified information provided in the permit application that all equipment and air pollution control devices regulated in this permit comply with all applicable State and Federal regulations. The facility shall be operated in accordance with the conditions of this permit. This operating permit supersedes any previous Air Pollution Control Operating Permits issued to this facility by the Department including any general operating permits, renewals, significant modifications, minor modifications, seven-day notice changes or administrative amendments to the permit.

This operating permit includes the following changes:

- Increase in Landfill Design Capacity. OCLC is requesting to increase the municipal solid waste (MSW) landfill (U64) permitted design capacity from 17.355 million Mg to 20.711 million Mg (U64, OS Summary, Ref. #3). This Design Capacity increase provides capacity for waste placement up to final elevations in Cell 7 Overfill and the Valley Fill. This modification commenced after July 17, 2014, and thus, the landfill is subject to NSPS XXX. Total permitted cumulative gas flow to the flare system (CD1, CD10 and CD11) will decrease from 3,210 MMscf in any calendar year (i.e. 6,107 scfm) to 3,161 MMscf in any calendar year (i.e. 6,014 scfm) based on the updated inputs to the LANDGEM modeling that include waste placement through 2025. The value of 3,161 MMscf in any calendar year (i.e. 6,014 scfm) is consistent with the values that were submitted by the Ocean County Landfill Corp. (OCLC), PI 78931 as part of the PSD non-applicability analysis for an increased design capacity of the landfill for the combined operation of all sources (landfill and engines) at the site. The permitted annual emissions from Landfill U64 are adjusted per total permitted cumulative gas flow to the flare system.
- Addressing the Sulfur Dioxide (SO₂) emissions increase from flares. OCLC is proposing to install an H₂S removal system to collect and treat LFG from the Sandy waste contained in portions of Cells 5 and 6, in order to achieve compliance with the SO₂ emission limits specified in Title V operating permit, per the NJDEP Administrative Consent Order dated November 30, 2015. The new H₂S removal system is addressed under an operating scenario U64 OS1.

3. This permit includes the Potential to Emit (PTE) for PM2.5 emissions for landfill U64 that were not accounted previously. The VOC emission rate listed in Permit BOP160001 was corrected based on the OCLC calculations.
4. Simultaneously with this permit BOP160002 for OCLC (PI 78931), the Department is also issuing a Title V permit for MRPC Holdings (PI 78901) that includes the restricted PTE values and restricted gas flow for emission units owned and operated by MRPC Holdings (Six CAT 3516 engines and six CAT 3520 engines) that were consistent with the values that were submitted by the Ocean County Landfill Corp. (OCLC) PI 78931 as part of the PSD non-applicability analysis for an increased design capacity of the landfill for the combined operation of all sources (landfill and engines) at the site.

This permit BOP160002 also includes Potential to Emit for air contaminants for a joint facility: Ocean County Landfill Corp. (OCLC) and MRPC Holdings LLC (MRPC), for which a Title V operating permit will be issued under PI 78931 at a later date. Those PTE are listed in BOP160002 under U64 OS Summary (Ref. #38).

PERMIT SHIELD

This operating permit includes a permit shield, pursuant to the provisions of N.J.A.C. 7:27-22.17.

COMPLIANCE SCHEDULES

This operating permit does not include compliance schedules as part of the approved compliance plan.

COMPLIANCE CERTIFICATIONS AND DEVIATION REPORTS

The permittee shall submit to the Department and to EPA periodic compliance certifications, in accordance with N.J.A.C. 7:27-22.19. **The annual compliance certification** is due to the Department and EPA within 60 days after the end of each calendar year during which this permit was in effect. **Semi-annual deviation reports** relating to compliance testing and monitoring are due to the Department within 30 days after the end of the semi-annual period. The schedule and additional details for these submittals are available in Subject Item - FC, of the Facility Specific Requirements of this permit.

ACCESSING PERMITS

The facility's current approved operating permit and any previously issued permits (e.g. superseded, expired, or terminated) are available for download in PDF format at: <http://www.nj.gov/dep/opra/online.html>. If needed, the RADIUS file for your permit, containing Facility Specific Requirements (Compliance Plan), Inventories and Compliance Schedules can be obtained by contacting the Helpline number given below. RADIUS software, instructions, and help are available at the Department's website at www.state.nj.us/dep/aqpp.

HELPLINE

The Operating Permit Helpline is available for any questions at (609) 633-8248 from 9:00 AM to 4:00 PM Monday to Friday.

RENEWING YOUR OPERATING PERMIT AND APPLICATION SHIELD

The permittee is responsible for submitting a timely and administratively complete operating permit renewal application pursuant to N.J.A.C. 7:27-22.30. Only applications which are timely and administratively complete are eligible for an application shield. The details on the contents of the renewal application, submittal schedule, and application shield are available in Section B - General Provisions and Authorities of this permit.

COMPLIANCE ASSURANCE MONITORING

Facilities that are subject to Compliance Assurance Monitoring (CAM), pursuant to 40 CFR 64, shall develop a CAM Plan for modified equipment as well as existing sources. The rule and guidance on how to prepare a CAM Plan can be found at EPA's website: <https://www.epa.gov/air-emissions-monitoring-knowledge-base/compliance-assurance-monitoring>. In addition, CAM Plans must be included as part of the permit renewal application. Facilities that do not submit a CAM Plan may have their permit applications denied, pursuant to N.J.A.C. 7:27-22.3.

ADMINISTRATIVE HEARING REQUEST

If, in your judgment, the Department is imposing any unreasonable condition of approval, you may contest the Department's decision and request an adjudicatory hearing pursuant to N.J.S.A. 52:14B-1 et seq. and N.J.A.C. 7:27-22.32(a). All requests for an adjudicatory hearing must be received in writing by the Department within 20 calendar days of the date you receive this letter. The request must contain the information specified in N.J.A.C. 7:27-1.32 and the information on the enclosed Administrative Hearing Request Checklist and Tracking Form.

If you have any questions regarding this permit approval, please call Eleonora Kats at (609) 984-5932.

IV. If you are not the Permittee but rather an interested person claiming to be aggrieved by the permit decision, please include the following information:

1. The date you or your agent received notice of the permit decision (include a copy of that permit decision with your hearing request);
2. Evidence that a copy of the request has been delivered to the applicant for the permit which is the subject of the permit decision;
3. A detailed statement of which findings of fact and/or conclusion of law you are challenging;
4. A description of your participation in any public hearings held in connection with the permit application and copies of any written comments you submitted;
5. Whether you claim a statutory or constitutional right to a hearing, and, if you claim such a right, a reference to the applicable statute or an explanation of how your property interests are affected by the permit decision;
6. If the appeal request concerns a CAFRA permit decision, evidence that a copy of the request has been delivered to the clerks of the county and the municipality in which the project which is the subject of the permit decision is located;
7. Suggested revised or alternative permit conditions;
8. An estimate of the time required for the hearing;
9. A request, if necessary, for a barrier-free hearing location for physically disabled persons;
10. A clear indication of any willingness to negotiate a settlement with the Department prior to the Department's transmittal of the hearing request to the Office of Administrative Law.

Emissions from all Insignificant Source Operations and Non-Source Fugitive Emissions (tons per year)										
Source Categories	Primary						Secondary			
	VOC (total)	NO _x	CO	SO ₂	TSP (total)	Other (total)	PM ₁₀ (total)	PM _{2.5} (total)	Pb	HAPs (total)
Insignificant Source Operations										
Non-Source Fugitive Emissions ³	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

VOC: Volatile Organic Compounds
 NO_x: Nitrogen Oxides
 CO: Carbon Monoxide
 SO₂: Sulfur Dioxide

TSP: Total Suspended Particulates
 Other: Any other air contaminant regulated under the Federal CAA
 PM₁₀: Particulates under 10 microns

PM_{2.5}: Particulates under 2.5 microns
 Pb: Lead
 HAPs: Hazardous Air Pollutants
 CO₂e: Carbon Dioxide equivalent

*Emissions summary of individual HAPs and Other Air Contaminants are provided on next page.

¹ Significant Source Operations and Insignificant Source Operations are defined at N.J.A.C. 7:27-22.1.

² Total CO₂e emissions for the facility that includes all significant sources (emission units, batch process, group) and insignificant sources.

³ Non-Source fugitive emissions are defined at N.J.A.C. 7:27-22.1 and are included if the facility falls into one or more categories listed at N.J.A.C. 7:27-22.2(a)2.

Other Air Contaminant	TPY

⁴ Do not sum the values below for the purpose of establishing a total HAP potential to emit. See previous page for the allowable total HAP emissions.

Section B

Facility Name: OCEAN CNTY LANDFILL CORP

Program Interest Number: 78931

Permit Activity Number: BOP160002

GENERAL PROVISIONS AND AUTHORITIES

1. No permittee shall allow any air contaminant, including an air contaminant detectable by the sense of smell, to be present in the outdoor atmosphere in a quantity and duration which is, or tends to be, injurious to human health or welfare, animal or plant life or property, or which would unreasonably interfere with the enjoyment of life or property. This shall not include an air contaminant that occurs only in areas over which the permittee has exclusive use or occupancy. Requirements relative only to nuisance situations, including odors, are not considered federally enforceable. [N.J.A.C. 7:27-22.16(g)8]

2. Any deviation from operating permit requirements which results in a release of air contaminants shall be reported to the Department as follows:

If the air contaminants are released in a quantity or concentration which poses a potential threat to public health, welfare or the environment or which might reasonably result in citizen complaints, the permittee shall report the release to the Department:

- i. Immediately on the Department hotline at 1-(877) 927-6337, pursuant to N.J.S.A. 26:2C-19(e); and
- ii. As part of the compliance certification required in N.J.A.C. 7:27-22.19(f). However, if the deviation is identified through source emissions testing, it shall be reported through the source emissions testing and monitoring procedures at N.J.A.C. 7:27-22.18(e)3; or

If the air contaminants are released in a quantity or concentration which poses no potential threat to public health, welfare or the environment and which will not likely result in citizen complaints, the permittee shall report the release to the Department as part of the compliance certification required in N.J.A.C. 7:27-22.19(f), except for deviations identified by source emissions testing reports, which shall be reported through the procedures at N.J.A.C. 7:27-22.18(e)3; or

If the air contaminants are released in a quantity or concentration which poses no potential threat to public health, welfare or the environment and which will not likely result in citizen complaints, and the permittee intends to assert the affirmative defense afforded by N.J.A.C. 7:27-22.16(l), the violation shall be reported by 5:00 PM of the second full calendar day following the occurrence, or of becoming aware of the occurrence, consistent with N.J.A.C. 7:27-22.16(l). [N.J.A.C. 7:27-22.19(g)]

3. The permittee shall comply with all conditions of the operating permit including the approved compliance plan. Any non-compliance with a permit condition constitutes a violation of the New Jersey Air Pollution Control Act N.J.S.A. 26:2C-1 et seq., or the CAA, 42 U.S.C. §7401 et seq., or both, and is grounds for enforcement action; for termination, revocation and reissuance, or for modification of the operating permit; or for denial of an application for a renewal of the operating permit. [N.J.A.C. 7:27-22.16(g)1]
4. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of its operating permit. [N.J.A.C. 7:27-22.16(g)2]
5. This operating permit may be modified, terminated, or revoked for cause by the EPA pursuant to 40 CFR 70.7(g) and revoked or reopened and modified for cause by the Department pursuant to N.J.A.C. 7:27-22.25. [N.J.A.C. 7:27-22.16(g)3]

6. The permittee shall furnish to the Department, within a reasonable time, any information that the Department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this operating permit; or to determine compliance with the operating permit. [N.J.A.C. 7:27-22.16(g)4]
7. The filing of an application for a modification of an operating permit, or of a notice of planned changes or anticipated non-compliance, does not stay any operating permit condition. [N.J.A.C. 7:27-22.16(g)5]
8. The operating permit does not convey any property rights of any sort, or any exclusive privilege. [N.J.A.C. 7:27-22.16(g)6]
9. Upon request, the permittee shall furnish to the Department copies of records required by the operating permit to be kept. [N.J.A.C. 7:27-22.16(g)7]
10. The Department and its authorized representatives shall have the right to enter and inspect any facility subject to N.J.A.C. 7:27-22, or portion thereof, pursuant to N.J.A.C. 7:27-1.31. [N.J.A.C. 7:27-22.16(g)9]
11. The permittee shall pay fees to the Department pursuant to N.J.A.C. 7:27. [N.J.A.C. 7:27-22.16(g)10]
12. Each permittee shall maintain records of all source emissions testing or monitoring performed at the facility and required by the operating permit in accordance with N.J.A.C. 7:27-22.19. Records shall be maintained, for at least five years from the date of each sample, measurement, or report. Each permittee shall maintain all other records required by this operating permit for a period of five years from the date each record is made. At a minimum, source emission testing or monitoring records shall contain the information specified at N.J.A.C. 7:27-22.19(b). [N.J.A.C. 7:27-22.19(a) and N.J.A.C. 7:27-22.19(b)]
13.
 - a. For emergencies (as defined at 40 CFR 70.6(g)(1)) that result in non-compliance with any promulgated federal technology-based standard such as NSPS, NESHAPS, or MACT, a federal affirmative defense is available, pursuant to 40 CFR 70. To assert a federal affirmative defense, the permittee must use the procedures set forth in 40 CFR 70. The affirmative defense provisions described below may not be applied to any situation that caused the Facility to exceed any federally delegated regulation, including but not limited to NSPS, NESHAP, or MACT.
 - b. For situations other than those covered above, an affirmative defense is available for a violation of a provision or condition of the operating permit only if:
 - i. The violation occurred as a result of an equipment malfunction, an equipment startup or shutdown, or during the performance of necessary equipment maintenance; and
 - ii. The affirmative defense is asserted and established as required by N.J.S.A. 26:2C-19.1 through 19.5 and any implementing rules. [N.J.A.C. 7:27-22.16(l)]
14. Each permittee shall meet all requirements of the approved source emissions testing and monitoring protocol during the term of the operating permit. Whenever the permittee makes a replacement, modification, change or repair of a certified CEMS or COMS that may significantly affect the ability of the system to accurately measure or record data, the permittee must recertify the CEMS or COMS in accordance with Section V.B. and Appendix E of Technical Manual 1005. The permittee is responsible for contacting the Emission Measurement Section to determine the need for recertification and/or to initiate the recertification process. The permittee is responsible for any downtime associated with the replacement, modification, change or repair of the CEMS or COMS. [N.J.A.C. 7:27-22.18(j)]
15. Each owner and each operator of any facility, source operation, or activity to which this permit applies is responsible for ensuring compliance with all requirements of N.J.A.C. 7:27-22. If the owner and operator are separate persons, or if there is more than one owner or operator, each owner and each operator is jointly and severally liable for any fees due under N.J.A.C. 7:27-22, and for any penalties for violation of N.J.A.C. 7:27-22. [N.J.A.C. 7:27-22.3]

16. In the event of a challenge to any part of this operating permit, all other parts of the permit shall continue to be valid. [N.J.A.C. 7:27-22.16(f)]
17. Unless specifically exempted from permitting, temporary mobile equipment for short-term activities may be periodically used at major facilities, on site for up to 90 days if the requirements listed below, (a) through (h) are satisfied.
 - a. The permittee will ensure that the temporary mobile equipment will not be installed permanently or used permanently on site.
 - b. The permittee will ensure that the temporary mobile equipment will not circumvent any State or Federal rules and regulations, even for a short period of time, and the subject equipment will comply with all applicable performance standards.
 - c. The permittee cannot use temporary mobile equipment unless the owner of the subject equipment has obtained and maintains an approved mobile preconstruction permit, issued pursuant to N.J.A.C. 7:27-8, prior to bringing the temporary mobile equipment to operate at the major facility.
 - d. The permittee is responsible for ensuring the temporary mobile equipment's compliance with the terms and conditions specified in its approved mobile preconstruction permit when the temporary mobile equipment operates on the property of the permittee.
 - e. The permittee will ensure that temporary mobile equipment utilized for short-term activities will not operate on site for more than a total of 90 days during any calendar year.
 - f. The permittee will keep on site a list of temporary mobile equipment being used at the facility with the start date, end date, and record of the emissions from all such equipment (amount and type of each air contaminant) no later than 30 days after the temporary mobile equipment completed its job in accordance with N.J.A.C. 7:27-22.19(i)3.
 - g. Emissions from the temporary mobile equipment must be included in the emission netting analysis required of the permittee by N.J.A.C. 7:27-18.7. This information is maintained on site by the permittee and provided to the Department upon request in accordance with existing applicable requirements in the FC Section of its Title V permit.
 - h. Where short-term activities (employing temporary mobile equipment) will reoccur on at least an annual basis, the permittee is required to include such activities (and the associated equipment) within one year of the first use, in its Title V permit through the appropriate modification procedures.
18. The permittee shall ensure that no air contaminant is emitted from any significant source operation at a rate, calculated as the potential to emit, that exceeds the applicable threshold for reporting emissions set forth in the Appendix to N.J.A.C. 7:27-22, unless emission of the air contaminant is authorized by this operating permit. [N.J.A.C. 7:27-22.3(c)]
19. Consistent with the provisions of N.J.A.C. 7:27-22.3(e), the permittee shall ensure that all requirements of this operating permit are met. In the event that there are multiple emission limitations, monitoring, recordkeeping, and/or reporting requirements for a given source operation, the facility must comply with all requirements, including the most stringent.
20. Consistent with the provisions of N.J.A.C. 7:27-22.9(c), the permittee shall use monitoring of operating parameters, where required by the compliance plan, as a surrogate for direct emissions testing or monitoring, to demonstrate compliance with applicable requirements.
21. The permittee is responsible for submitting timely and administratively complete operating permit applications:

Administrative Amendments [N.J.A.C. 7:27-22.20(c)];
Seven-Day Notice changes [N.J.A.C. 7:27-22.22(e)];
Minor Modifications [N.J.A.C. 7:27-22.23(e)];
Significant Modifications [N.J.A.C. 7:27-22.24(e)]; and
Renewals [N.J.A.C. 7:27-22.30(b)].

22. The operating permit renewal application consists of a RADIUS application and the application attachment available at the Department's website <http://www.nj.gov/dep/aqpp/applying.html> (Attachment to the RADIUS Operating Permit Renewal Application). Both the RADIUS application and the Application Attachment, along with any other supporting documents must be submitted using the Department's Portal at: <http://njdeponline.com/>. The application is considered timely if it is received at least 12 months before the expiration date of the operating permit. To be deemed administratively complete, the renewal application shall include all information required by the application form for the renewal and the information required pursuant to N.J.A.C. 7:27-22.30(d). However, consistent with N.J.A.C. 7:27-22.30(c), the permittee is encouraged to submit the renewal application at least 15 months prior to expiration of the operating permit, so that any deficiencies can be identified and addressed to ensure that the application is administratively complete by the renewal deadline. Only renewal applications which are timely and administratively complete are eligible for an application shield.
23. Except as allowed in Technical Manual 1005, or otherwise allowed by the Department in this permit or in written guidelines/ procedures issued or approved by the Department, process monitors required by the Compliance Plan included in this permit must be operated at all times when the associated process equipment is operating. The permittee must keep a service log to document any outage.
24. Consistent with the provisions of N.J.A.C. 7:27-22.3(s), Except as otherwise provided in this subchapter, the submittal of any information or application by a permittee including, but not limited to, an application or notice for any change to the operating permit, including any administrative amendment, any minor or significant modification, renewal, a notice of a seven-day notice change, a notice of past or anticipated noncompliance, does not stay any operating permit condition, nor relieve a permittee from the obligation to obtain other necessary permits and to comply with all applicable Federal, State, and local requirements.
25. For all source emissions testing performed at the facility, the phrase "worst case conditions without creating an unsafe condition" used in the enclosed compliance plan is consistent with EPA's National Stack Testing Guidance, dated April 27, 2009, where all source emission testing performed at the facility shall be under the representative (normal) conditions that:
 - i. Represent the range of combined process and control measure conditions under which the facility expects to operate (regardless of the frequency of the conditions); and
 - ii. Are likely to most challenge the emissions control measures of the facility with regard to meeting the applicable emission standards, but without creating an unsafe condition.

STATE-ONLY APPLICABLE REQUIREMENTS

N.J.A.C. 7:27-22.16(b)5 requires the Department to specifically designate as not being federally enforceable any permit conditions based only on applicable State requirements. The applicable State requirements to which this provision applies are listed in the table titled "State-Only Applicable Requirements."

STATE-ONLY APPLICABLE REQUIREMENTS

The following applicable requirements are not federally enforceable:

New Jersey Department of Environmental Protection
Reason for Application

Permit Being Modified

Permit Class: BOP **Number:** 160001

Description of Modifications: Significant modification to BOP160001 with the following changes: 1. Increase in Landfill Design Capacity. OCLC is requesting to increase the municipal solid waste (MSW) landfill (U64) permitted design capacity from 17.355 million Mg to 20.711 million Mg (U64, OS Summary, Ref. #3). This Design Capacity increase provides capacity for waste placement up to final elevations in Cell 7 Overfill and the Valley Fill. This modification commenced after July 17, 2014, and thus, the landfill is subject to NSPS XXX. Total permitted cumulative gas flow to the flare system (CD1, CD10 and CD11) will decrease from 3,210 MMscf in any calendar year (i.e. 6,107 scfm) to 3,161 MMscf in any calendar year (i.e. 6,014 scfm) based on the updated inputs to the LANDGEM modeling that include waste placement through 2025. The value of 3,161 MMscf in any calendar year (i.e. 6,014 scfm) is consistent with the values that were submitted by the Ocean County Landfill Corp. (OCLC), PI 78931 as part of the PSD non-applicability analysis for an increased design capacity of the landfill for the combined operation of all sources (landfill and engines) at the site. The permitted annual emissions from Landfill U64 are adjusted per total permitted cumulative gas flow to the flare system.

2. Addressing the Sulfur Dioxide (SO₂) emissions increase from flares. OCLC is proposing to install an H₂S removal system to collect and treat LFG from the Sandy waste contained in portions of Cells 5 and 6, in order to achieve compliance with the SO₂ emission limits specified in Title V operating permit, per the NJDEP Administrative Consent Order dated November 30, 2015. The new H₂S removal system is addressed under an operating scenario U64 OS1.

3. This permit includes the Potential to Emit (PTE) for PM_{2.5} emissions for landfill U64 that were not accounted previously. The VOC emission rate listed in Permit BOP160001 was corrected based on the OCLC calculations.

4. Simultaneously with this permit BOP160002 for OCLC (PI 78931), the Department is also issuing a Title V permit for MRPC Holdings (PI78901) that includes the restricted PTE values and restricted gas flow for emission units owned and operated by MRPC Holdings (Six CAT 3516 engines and six CAT 3520 engines) that were consistent with the values that were submitted by the Ocean County Landfill Corp. (OCLC) PI 78931 as part of the PSD non-applicability analysis for an increased design capacity of the landfill for the combined operation of all sources (landfill and engines) at the site.

This permit BOP160002 also includes Potential to Emit for air contaminants for a joint facility: Ocean County Landfill Corp. (OCLC) and MRPC Holdings LLC (MRPC), for which a Title V operating permit will be issued under PI 78931 at a later date. Those PTE are listed in BOP160002 under U64 OS Summary (Ref. #38)

BOP160002

**New Jersey Department of Environmental Protection
Facility Specific Requirements**

Subject Item: FC

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
1	General Provisions: The permittee shall comply with all applicable provisions of N.J.A.C. 7:27-1. [N.J.A.C. 7:27- 1]	None.	None.	None.
2	Control and Prohibition of Open Burning: The permittee is prohibited from open burning of rubbish, garbage, trade waste, buildings, structures, leaves, other plant life and salvage. Open burning of infested plant life or dangerous material may only be performed with a permit from the Department. [N.J.A.C. 7:27- 2]	None.	None.	Obtain an approved permit: Prior to occurrence of event (prior to open burning). [N.J.A.C. 7:27- 2]
3	Prohibition of Air Pollution: The permittee shall not emit into the outdoor atmosphere substances in quantities that result in air pollution as defined at N.J.A.C. 7:27-5.1. [N.J.A.C. 7:27- 5]	None.	None.	None.
4	Prevention and Control of Air Pollution Control Emergencies: Any person responsible for the operation of a source of air contamination set forth in Table 1 of N.J.A.C. 7:27-12 is required to prepare a written Standby Plan, consistent with good industrial practice and safe operating procedures, and be prepared for reducing the emission of air contaminants during periods of an air pollution alert, warning, or emergency. Any person who operates a source not set forth in Table 1 of N.J.A.C. 7:27-12 is not required to prepare such a plan unless requested by the Department in writing. [N.J.A.C. 7:27-12]	None.	None.	Comply with the requirement: Upon occurrence of event. Upon proclamation by the Governor of an air pollution alert, warning, or emergency, the permittee shall put the Standby Plan into effect. In addition, the permittee shall ensure that all of the applicable emission reduction objectives of N.J.A.C. 7:27-12.4, Table I, II, and III are complied with whenever there is an air pollution alert, warning, or emergency. [N.J.A.C. 7:27-12]
5	Emission Offset Rules: The permittee shall comply with all applicable provisions of Emission Offset Rules. [N.J.A.C. 7:27-18]	None.	None.	None.
6	Emission Statements: The Permittee shall comply with all the applicable provisions of N.J.A.C. 7:27-21. [N.J.A.C. 7:27-21]	None.	None.	None.

Facility Specific Requirements**

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
7	Compliance Certification: The permittee shall submit an annual Compliance Certification for each applicable requirement, pursuant to N.J.A.C. 7:27-22.19(f). [N.J.A.C. 7:27-22]	None.	None.	Submit an Annual Compliance Certification: Annually to the Department and to EPA within 60 days after the end of each calendar year during which this permit was in effect. The Compliance Certification shall be certified pursuant to N.J.A.C. 7:27-1.39 by the responsible official and submitted electronically through the NJDEP online web portal. The certification should be printed for submission to EPA. The NJDEP online web portal can be accessed at: http://www.state.nj.us/dep/online/ . The Compliance Certification forms and instructions for submitting to EPA are available by selecting Documents and Forms and then Periodic Compliance Certification. [N.J.A.C. 7:27-22]
8	Prevention of Air Pollution from Consumer Products and Architectural Coatings: The permittee shall comply with all applicable provisions of N.J.A.C. 7:27-24 and [N.J.A.C. 7:27-23]	None.	None.	None.
9	Any operation of equipment which causes off-property effects, including odors, or which might reasonably result in citizen's complaints shall be reported to the Department to the extent required by the Air Pollution Control Act, N.J.S.A. 26:2C-19(e). [N.J.S.A. 26: 2C-19(e)]	Other: Observation of plant operations. [N.J.S.A. 26: 2C-19(e)].	Other: Maintain a copy of all information submitted to the Department. [N.J.S.A. 26: 2C-19(e)].	Notify by phone: Upon occurrence of event. A person who causes a release of air contaminants in a quantity or concentration which poses a potential threat to public health, welfare or the environment or which might reasonably result in citizen complaints shall immediately notify the Department. Such notification shall be made by calling the Environmental Action Hotline at (877) 927-6337. [N.J.S.A. 26: 2C-19(e)]
10	Prevention of Significant Deterioration: The permittee shall comply with all applicable provisions of Prevention of Significant Deterioration (PSD). [40 CFR 52.21]	None.	None.	None.

**New Jersey Department of Environmental Protection
Facility Specific Requirements**

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
11	The permittee shall comply with all applicable provisions of National Emission Standards for Hazardous Air Pollutants (NESHAPS) for Asbestos, Subpart M. [40 CFR 61]	Other: Comply with 40 CFR 61.145 and 61.150 when conducting any renovation or demolition activities at the facility. [40 CFR 61].	Other: Comply with 40 CFR 61.153 when conducting any renovation or demolition activities at the facility. [40 CFR 61].	Comply with the requirement: Upon occurrence of event. The permittee shall comply with 40 CFR 61.153 when conducting any renovation or demolition activities at the facility. [40 CFR 61]
12	Protection of Stratospheric Ozone: 1) If the permittee manufactures, transforms, destroys, imports, or exports a Class I or Class II substance, the permittee is subject to all the requirements as specified at 40 CFR 82, Subpart A; 2) If the permittee performs a service on motor "fleet" vehicles when this service involves an ozone depleting substance refrigerant (or regulated substance) in the motor vehicle air conditioner (MVAC), the permittee is subject to all the applicable requirements as specified at 40 CFR 82, Subpart B. 3) The permittee shall comply with the standards for labeling of products containing or manufactured with ozone depleting substances pursuant to 40 CFR 82, Subpart E. 4). The permittee shall comply with the standards for recycling and emission reductions of Class I and Class II refrigerants or a regulated substitute substance during the service, maintenance, repair, and disposal of appliances pursuant to 40 CFR 82, Subpart F, except as provided for motor vehicle air conditioners (MVACs) in Subpart B. 5) The permittee shall be allowed to switch from any ozone depleting substance to any alternative that is listed in the Significant New Alternative Program (SNAP) promulgated pursuant to 40 CFR 82, Subpart G. [40 CFR 82]	Other: Comply with 40 CFR 82 Subparts A, B, E, F, and G. [40 CFR 82].	Other: Comply with 40 CFR 82 Subparts A, B, E, F, and G. [40 CFR 82].	Comply with the requirement: Upon occurrence of event. The permittee shall comply with 40 CFR 82 Subparts A, B, E, F, and G. [40 CFR 82]

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
13	Deviation Reports: The permittee shall submit to the Department a certified six-month Deviation Report relating to testing and monitoring required by the operating permit. [N.J.A.C. 7:27-22.19(d)3], [N.J.A.C.7:27-22.19(e)], and [N.J.A.C. 7:27-22.19(c)]	None.	Other: The permittee shall maintain deviation reports for a period of five years from the date each report is submitted to the Department. [N.J.A.C.7:27-22.19(a)] and [N.J.A.C. 7:27-22.19(e)].	Submit a report: As per the approved schedule. The six-month deviation reports for the period from January 1 through June 30 shall be submitted by July 30 of the same calendar year, and for the period from July 1 through December 31, shall be submitted by January 30 of the following calendar year. The annual compliance certification required by N.J.A.C.7:27-22.19(f) may also be considered as your six-month Deviation Report for the period from July 1 – December 31, if submitted by January 30 of the following calendar year. The reports shall be certified pursuant to N.J.A.C. 7:27-1.39 by the responsible official and submitted electronically through the NJDEP online web portal. The NJDEP online web portal can be accessed at: http://www.state.nj.us/dep/online/ . The Compliance Certification forms are available by selecting Documents and Forms and then Periodic Compliance Certification. [N.J.A.C. 7:27-22]
14	Used Oil Combustion: No person shall combust used oil except as authorized pursuant to N.J.A.C. 7:27-20. [N.J.A.C. 7:27-20.2]	None.	None.	Comply with the requirement: Prior to occurrence of event (prior to burning used oil) either register with the Department pursuant to N.J.A.C. 7:27-20.3 or obtain a permit issued by the Department pursuant to N.J.A.C. 7:27-8 or 7:27-22, whichever is applicable. [N.J.A.C. 7:27-20.2(d)]
15	Prevention of Accidental Releases: Facilities producing, processing, handling or storing a chemical, listed in the tables of 40 CFR Part 68.130, and present in a process in a quantity greater than the listed Threshold Quantity, shall comply with all applicable provisions of 40 CFR 68. [40 CFR 68]	Other: Comply with 40 CFR 68. [40 CFR 68].	Other: Comply with 40 CFR 68. [40 CFR 68].	Other (provide description): Other. Comply with 40 CFR 68 as described in the Applicable Requirement. Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
3	The permittee shall not use the equipment in a manner which will cause visible emissions, exclusive of condensed water vapor, except for 3 minutes in any consecutive 30 minute period. [N.J.A.C. 7:27-22.16(e)]	Other: Monitored by visual determination once per week during operation, based on any consecutive 30-minute period. For compliance with the opacity standard, the permittee shall conduct visual opacity inspections during daylight hours. Visual inspections shall consist of a visual survey to identify if the stack has visible emissions, (other than condensed water vapor), greater than the prescribed standard (See Applicable Requirement). If visible emissions are observed, the permittee shall do the following: (1) Verify that the equipment and/or control device causing the emission is operating according to manufactures specifications and the operating permit compliance plan. If the equipment or control device is not operating properly, the permittee shall take corrective action immediately to eliminate the excess emissions. The permittee must report any permit violations to NJDEP pursuant to N.J.A.C. 7:27-22.19.; (2) If the corrective action taken in step (1) does not correct the opacity problem within 24 hours, the applicant shall perform a check via a certified opacity reader, in accordance with N.J.A.C. 7:27B-2. Such test shall be conducted each day until corrective action is taken to successfully correct the opacity problem.[N.J.A.C. 7:27-22.16(o)].	Other: Recordkeeping by manual or electronic logging of parameter once per week during operation. Manually log in a logbook or in readily accessible computer memories and retain the following records: (1) Date and time of inspection; (2) Emission Point number; (3) Operational status of equipment; (4) Observed results and conclusions; (5) Description of corrective action taken if needed; (6) Date and time opacity problem was solved, if applicable; (7) N.J.A.C. 7:27B-2 results if conducted; and (8) Name of person(s) conducting inspection.[N.J.A.C. 7:27-22.16(o)].	Comply with the requirement: As per the approved schedule. The permittee shall report permit violations (excess visible emissions) to the Department pursuant to N.J.A.C. 7:27-22.19. [N.J.A.C. 7:27-22.16(o)]
4	Opacity: no visible emissions, exclusive of condensed water vapor, except for a period no longer than three minutes in any consecutive thirty minute period. [N.J.A.C. 7:27-22.16(e)]	Opacity: Monitored by visual determination upon request of the Department, based on an instantaneous determination. [N.J.A.C. 7:27-22.16(e)]	Opacity: Recordkeeping by manual logging of parameter upon request of the Department. [N.J.A.C. 7:27-22.16(e)]	None.

Emission Unit: U64 Landfill, Waste transfer and processing equipped with H2S Plus control pretreatment system

Operating Scenario: OS1 Landfill Waste Transfer and Processing equipped with H2S Plus control pretreatment system

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
1	This applicable requirement applies to CD1 and CD10. The flare shall reduce non-methane organic compounds (NMOC) by 98 weight percent or reduce NMOC outlet concentrations to less than 20 ppmv by volume. [N.J.A.C. 7:27-22.16(a)]	Monitored by temperature instrument continuously. [N.J.A.C. 7:27-22.16(o)]	Recordkeeping by strip chart or data acquisition (DAS) system continuously. [N.J.A.C. 7:27-22.16(o)]	None.
2	This applicable requirement applies to open flare CD11. The permittee must install, calibrate, and maintain according to manufacturer's specifications a gas flow rate measuring device that must measure and record the flow to the open flare. Open flare must be designed and operated in accordance with 40 CFR 60.18. [N.J.A.C. 7:27-22.16(a)]	Monitored by fuel flow/firing rate instrument continuously, based on 15 minute intervals. [N.J.A.C. 7:27-22.16(o)]	Recordkeeping by data acquisition system (DAS) / electronic data storage continuously. The landfill gas flow must be recorded at least every 15 minutes. [N.J.A.C. 7:27-22.16(o)]	None.
3	For CD 11 only: Stack Gas Discharge Velocity \leq 60 ft/sec. [40 CFR 60.18(c)(4)(i)]	Stack Gas Discharge Velocity: Monitored by the Department approved testing method once initially for determining the volumetric flowrate and unobstructed cross sectional area of the flare tip. [N.J.A.C. 7:27-22.16(o)]	Stack Gas Discharge Velocity: Recordkeeping by manual logging of parameter or storing data in a computer data system upon occurrence of event. [N.J.A.C. 7:27-22.16(o)]	Submit a performance test protocol: Within 60 days from the date of the approved permit. Conduct the testing as agreed upon with the Emission Measurement Section (EMS) but no later than 60 days after the approval of protocol. Report results to EMS within 45 days of actual field test. [N.J.A.C. 7:27-22.16(o)]
4	CO \leq 24.17 lb/hr. [N.J.A.C. 7:27-22.16(e)]	CO: Monitored by stack emission testing once initially and prior to permit expiration date, based on the average of three Department validated stack test runs. 26	<p>Submit a collection and control system design plan to the Administrator for approval. The collection and control system shall meet the design requirements in 40 CFR 60.762(b)(2)(ii) and (b)(2)(iii). The collection and control system design plan must be prepared and approved by a professional engineer and must meet the requirements in 40 CFR 60.767(c). The collection and control system design plan must conform with specifications for active collection systems in 40 CFR 60.769.</p> <p>Per 40 CFR 60.767(d), submit a revised collection and control system design plan as follows: (1) at least 90 days before expanding operations to an area not covered by the previously approved design plan; (2) Prior to installing or expanding the gas collection system in a way that is not consistent with the design plan previously submitted to the Administrator. [40 CFR 60.762(b)(2)(i)]</p>	None.	None.	<p>Submit a plan: Once initially. The collection and control system design plan shall be submitted to the Administrator for approval within 1 year of the NMOC emission rate report that shows the NMOC emissions equal to or greater than 34 megagrams per year. The Administrator must either approve, disapprove, or request additional information. If the Administrator does not approve or disapprove the design plan, or does not request the additional information within 90 days of receipt, then the owner or operator may continue with implementation of the design plan, recognizing they would be proceeding at their own risk.</p> <p>The revised collection and control system design plan shall be submitted in accordance with the schedule in 40 CFR 767(d). [40 CFR 60.767(c)]</p>

Facility Specific Requirements**

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
27	<p>The owner or operator must install and start up an active collection and control system within 30 months after the first annual report in which the NMOC emission rate equals to or exceeds 34 megagrams per year. The active collection system must:</p> <p>(1) Be designed to handle the maximum expected gas flow rate from the entire area of the landfill that warrants control over the intended use period of the gas control system equipment; (2) Collect gas from each area, cell, or group of cells in the landfill in which the initial solid waste has been placed for a period of 5 years or more if active; or 2 years or more if closed or at final grade. (3) Collect gas at a sufficient extraction rate; (4) Be designed to minimize off-site migration of subsurface gas.</p> <p>The gas collection system must be constructed using the equipment or processes described in 40 CFR 60.769(b). [40 CFR 60.762(b)(2)(ii)]</p>	<p>Other: The owner or operator shall determine whether the gas collection system is in compliance with 40 CFR 60.762(b)(2)(ii) using procedures in 40 CFR 60.765(a)(1) - calculating the maximum expected gas generation flow rate, (a)(2) - determining the density of gas collectors and (a)(3) - determining whether the gas collection system flow rate is sufficient. [40 CFR 60.765(a)].</p>	<p>Recordkeeping by manual logging of parameter or storing data in a computer data system upon occurrence of event. The owner or operator must keep up-to-date, readily accessible records for the life of the control system of the data in 40 CFR 60.768(b)(1) through (b)(5) as measured during the initial performance test or compliance demonstration. Records of subsequent tests or monitoring must be maintained for a minimum of 5 years.</p> <p>Per 40 CFR 60.768(c)(5), the owner or operator must keep records of periods when the collection system or control device is not operating. [40 CFR 60.768(b)(1)]</p>	<p>Submit a report: Annually. Submit an annual report electronically to Administrator. The reports shall be submitted to the EPA via CEDRI through the EPA's Central Data Exchange (CDX).</p> <p>The report shall include all the information required in 40 CFR 60.767(g)(1) through (g)(7). The initial annual report shall be submitted within 180 days of installing and startup of the collection and control system and must include the initial performance test report required under 40 CFR 60.8 and 40 CFR 60.767(h), as applicable. [40 CFR 60.767(g)]</p>

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
31	<p>The collection and control system may be capped, removed or decommissioned if (A) a landfill is closed and a closure report has been submitted to the Administrator; (B) the collection system has been in operation a minimum of 15 years or the owner or operator demonstrates that the GCCS will be unable to operate for 15 years due to declining gas flow; and (C) the calculated NMOC emission rate based on the procedures specified in 40 CFR 60.764(b) is less than 34 megagrams per year on three successive test dates. [40 CFR 60.762(b)(2)(v)]</p>	<p>Monitored by calculations upon occurrence of event. The owner or operator must calculate the NMOC emission rate in accordance with 40 CFR 60.764(b) based on the measurements of the total flow rate and the average NMOC concentration. The test dates must be no less than 90 days apart, and no more than 180 days apart, per 40 CFR 60.762(b)(2)(v)(C). [40 CFR 60.764(b)]</p>	<p>None.</p>	<p>Submit a report: Upon occurrence of event. The owner or operator of a controlled landfill must submit a closure report within 30 days of waste acceptance cessation. If a closure report has been submitted to the Administrator, no additional wastes may be placed into the landfill without filling a notification of modification as described under 40 CFR 60.7(a)(4). [40 CFR 60.767(e)]</p>
32	<p>The collection system shall be operated such that gas is collected from each area, cell, or group of cells in the MSW Landfill in which solid waste has been in place for: (1) 5 years or more if active; or (2) 2 years or more if closed or at final grade. Each well or designed component must be placed as specified in the approved design plan as provided in 40 CFR 60.767(c). [40 CFR 60.763(a)]</p>	<p>Other: Each well must be installed no later than 60 days after the date on which the initial solid waste has been in place for a period of: (1) 5 years or more if active; or (2) 2 years or more if closed or at final grade. [40 CFR 60.765(b)].</p>	<p>Recordkeeping by manual logging of parameter or storing data in a computer data system upon occurrence of event. The owner or operator must keep for at least 5 years up-to-date, readily accessible, on-site records of the collection and control system design plan, the current amount of solid waste in place, and the year-by-year waste acceptance rate. Off-site records may be maintained if they are retrievable within 4 hours. Either paper copy or electronic formats are acceptable. [40 CFR 60.768(a)]</p>	<p>Demonstrate compliance: As per the approved schedule. The owner or operator must operate the collection system in accordance with an approved collection and control system design plan. [40 CFR 60.767(c)]</p>

35	<p>The owner or operator must operate the collection system so that the methane concentration is less than 500 ppm above background at the surface of the landfill.</p> <p>The surface testing must be conducted around the perimeter of the collection area and along a pattern that traverses the landfill at no more than 30-meter intervals and where visual observations indicate elevated concentrations of landfill gas, such as distressed vegetation and cracks or seeps in the cover and all cover penetrations.</p> <p>A surface monitoring design plan must be developed that includes a topographical map with the monitoring route and the rationale for any site-specific deviations from the 30-meter intervals.</p> <p>The owner or operator must implement a program to monitor for cover integrity and implement cover repairs as necessary on a monthly basis per 40 CFR 60.765(c)(5). [40 CFR 60.763(d)]</p>	<p>Monitored by periodic emission monitoring quarterly: once per quarter; quarters shall begin on January 1, April 1, July 1, and October 1 of each year. Monitor surface concentrations of methane along the entire perimeter of the collection area and along a pattern that traverses the landfill at 30 meter intervals (or a site specific established spacing) for each collection area using an organic vapor analyzer, flame ionization detector, or other portable monitor meeting the specifications provided in 40 CFR 60.765(d).</p> <p>The background concentration must be determined by moving the probe inlet upwind and downwind outside the boundary of the landfill at a distance of at least 30 meters from the perimeter wells. Surface emission monitoring must be performed in accordance with section 8.3.1 of Method 21 of appendix A to 40 CFR 60, except that the probe inlet must be placed within 5 to 10 centimeters of the ground. Monitoring must be performed during typical meteorological conditions. [40 CFR 60.765(c)]</p>	<p>Recordkeeping by manual logging of parameter or storing data in a computer data system quarterly: once per quarter; quarters shall begin on January 1, April 1, July 1, and October 1 of each year. Any reading of 500 ppm or more above background must be recorded as a monitored exceedance and the actions specified in 40 CFR 60.765(c)(4)(i) through (v) must be taken.</p> <p>The owner or operator must keep for at least 5 years up-to-date, readily accessible records of all collection and control system exceedances of the operational standards in 40 CFR 60.763, the reading in the subsequent month whether or not the second reading is an exceedance, and the location of each exceedance. [40 CFR 60.765(c)(4)]</p>	<p>Demonstrate compliance: Upon occurrence of event. In case of an exceedance of 500 ppm methane concentration:</p> <p>i) The location and concentration of each monitored exceedance must be marked and recorded. (ii) Cover maintenance or adjustments to the vacuum of the adjacent wells in the vicinity of each exceedance must be made and the location must be re-monitored within 10 calendar days of detecting the exceedance. (iii) If the re-monitoring shows a second exceedance, additional corrective action must be taken and the location must be monitored again within 10 days of the second exceedance. If the re-monitoring shows a third exceedance for the same location, the action in (v) must be taken. (iv) Any location that initially showed an exceedance but has a methane concentration less than 500 ppm methane above background at the 10-day re-monitoring must be re-monitored 1 month from the initial exceedance. If the 1-month re-monitoring shows a concentration less than 500 ppm, no further monitoring of that location is required until the next quarterly monitoring period. If the 1-month re-monitoring shows an exceedance, the actions specified in (iii) or (v) must be taken. (v) For any location where monitored methane concentration equals or exceeds 500 ppm above background three times within a quarterly period, a new well or other collection device must be installed within 120 calendar days of the initial exceedance. [40 CFR 60.765(c)(4)]</p>

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
47	The owner or operator shall submit to the Administrator the initial design capacity report. The initial design capacity report must contain information specified in 40 CFR 60.767(a)(2). [40 CFR 60.767(a)]	None.	Recordkeeping by manual logging of parameter or storing data in a computer data system annually. The owner or operator must keep readily accessible, on-site records of the annual recalculation of site specific density, design capacity, and the supporting documentation. Off-site records may be maintained if they are retrievable within 4 hours. Either paper copy or electronic formats are acceptable. [40 CFR 60.767(a)(2)(ii)]	Submit a report: Once initially to the Administrator by November 28, 2016 for landfills that commenced construction, modification, or reconstruction before August 29, 2016 or ninety days after the date of commenced construction, modification, or reconstruction for landfills that commence construction, modification, or reconstruction after August 29, 2016. OCLC submitted the initial design capacity report to EPA/NJDEP Central Enforcement Office on November 28, 2016. [40 CFR 60.767(a)(1)]
48	The owner or operator shall submit to the Administrator amended design capacity report providing notification of an increase in the design capacity. This increase in design capacity may result from an increase in the permitted volume of the landfill or an increase in the density as documented in the annual recalculation required in 40 CFR 60.768(f). [40 CFR 60.767(a)(3)]	None.	Recordkeeping by manual logging of parameter or storing data in a computer data system annually. The owner or operator must keep readily accessible, on-site records of the annual recalculation of site specific density, design capacity, and the supporting documentation. Off-site records may be maintained if they are retrievable within 4 hours. Either paper copy or electronic formats are acceptable. [40 CFR 60.768(f)]	Submit a report: Upon occurrence of event to the Administrator within 90 days of an increase in the maximum design capacity of the landfill. This increase in design capacity may result from an increase in the permitted volume of the landfill or an increase in the density as documented in the annual recalculation required in 40 CFR 60.768(f). [40 CFR 60.767(a)(3)]
49	The owner or operator of a controlled landfill must submit a closure report within 30 days of waste acceptance cessation. If a closure report has been submitted to the Administrator, no additional wastes may be placed into the landfill without filling a notification of modification as described under 40 CFR 60.7(a)(4). [40 CFR 60.767(e)]	None.	None.	Submit a report: Upon occurrence of event to the Administrator within 30 days of waste acceptance cessation. [40 CFR 60.767(e)]

Emission Unit: U66 RICE powered material Screener for SLP area

Operating Scenario: OS Summary

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
1	The fugitive emissions from excavated waste, stripped soil cover material staging, and stockpiling of screened oversize and undersize material shall be below deminimus level of 0.05 lb./hr of total suspended particulates. [N.J.A.C. 7:27-22.16(a)]	Monitored by calculations once initially and prior to permit expiration date based on the allowable or actual rate and duration of excavation, stock piling and screening. Permittee may use emission factors from US EPA AP 42 publication. [N.J.A.C. 7:27-22.16(a)]	None.	
2	The Diesel Engine (Tier 3) powering each of screener shall be taken out of service after the 10 years from of start up date. NOTE: However, if an engine installed on or before the start up date is certified to Tier 4 specifications, the permittee may apply and the department shall waive the ten year time limit. [N.J.A.C. 7:27-22.16(a)]			Submit a report: Prior to occurrence of event of retiring the engines at the end of ten years of use. [N.J.A.C. 7:27-22]
3	The permittee shall not use screener(s) to process the excavated material from landfill in excess of 600 tons per hour of feed rate for total screening capacity. This screening capacity can be achieved by using up to two individual screeners. [N.J.A.C. 7:27-22.16(a)]	Monitored by waste feed/charge rate monitoring (solid) once per calendar day during operation, based on one calendar day. Alternatively the permittee may monitor by volumetric material moved from screener to the storage area. You may use appropriate density of material moved to arrive at weight basis. [N.J.A.C. 7:27-22.16(a)]	Recordkeeping by manual logging of parameter or storing data in a computer data system daily. [N.J.A.C. 7:27-22.16(a)]	
4	The screener and engine shall be operated as per manufacturer's Operating and Maintenance manual. [N.J.A.C. 7:27-22.16(a)]		Recordkeeping by manual logging of parameter or storing data in a computer data system once initially. The O & M manual shall be made available to the Department's representative upon request. [N.J.A.C. 7:27-22.16(a)]

6	<p>Ambient air concentration H2S <= 30 ppbv. [N.J.A.C. 7:27-22.16(a)]</p>	<p>H2S: Monitored by periodic emission monitoring twice per day (i.e. two monitoring events approximately four hours apart) based on 30 minute block average. Periodic emission monitoring shall be performed at least twice per day, downwind of the excavation site at the property boundary. OCLC may reduce the frequency of monitoring H2S to once per day, if sixty consecutive readings during monitoring events show H2S concentration of less than 30 ppbv. Subsequently, if the H2S concentration measured to be 30 ppbv or above, OCLC shall revert to at least two monitoring events per day. This frequency of monitoring described above shall be repeated with each new phase of excavation starting with twice a day.</p> <p>NOTE: 1. During first five minutes of any monitoring event, if the H2S concentration detected is 3 ppbv or lower, the permittee may discontinue the monitoring for remaining 25 minutes. 2. OCLC may propose further reduction in monitoring H2S by submitting application using procedures for minor modification of the current permit laid down pursuant to N.J.A.C. 7:27-22.23, only if during monitoring events within first 180 working days show H2S concentration of less than 30 ppbv. [N.J.A.C. 7:27-22.16(o)]</p>	<p>H2S: Recordkeeping by manual logging of parameter or storing data in a computer data system upon occurrence of event for each monitoring event.</p> <p>A. For monitoring events, the following parameters shall be recorded: Date, Time, Name of Persons conducting monitoring, Wind Speed, Wind Direction, Location of Measurement and H2S concentrations. B. OCLC shall record the date and time of the activation of the Corrective Action Plan. C. OCLC shall record the date and time of the commencement of the excavation of any new phase.</p> <p>All records shall be kept in a permanently bound log book or readily accessible computer memories acceptable to the Regional Enforcement Office. [N.J.A.C. 7:27-22.16(a)]</p>	<p>Submit notification: As per the approved schedule. As soon as H2S concentration of 30 ppbv or greater is detected, the designated Emergency Co-coordinator Supervisor (ECS) shall implement the Corrective Actions Plan described in OCLC's Health and Safety Plan.</p> <p>If the corrective actions undertaken cannot decrease H2S below 0.03 ppmv within four hours, or OCLC cannot demonstrate to the Department's satisfaction that OCLC is not the source of the H2S within thirty minutes, all activities related to excavation shall cease.</p> <p>The ECS shall continue to take corrective measures until the H2S concentration is below 30 ppbv. OCLC shall immediately notify the Department's Hotline at 1-(877)-WARNDPEP upon any exceedances of the 30 ppbv Action Limit and/or upon the activation of the Corrective Action Plan.</p> <p>OCLC shall notify the Department's Hotline at 1-(877)-WARNDPEP 24 hrs prior to changing the frequency of periodic monitoring events and/or the excavation of any new phase. [N.J.A.C. 7:27-22.16(a)]</p>

This frequency of monitoring described above shall be repeated with each new phase of excavation starting with twice a day.</p> <p>NOTE: 1. During first five minutes of any monitoring event, if the H2S concentration detected is 3 ppbv or lower, the permittee may discontinue the monitoring for remaining 25 minutes. 2. OCLC may propose further reduction in monitoring H2S by submitting application using procedures for minor modification of the current permit laid down pursuant to N.J.A.C. 7:27-22.23, only if during monitoring events within first 180 working days show H2S concentration of less than 30 ppbv. [N.J.A.C. 7:27-22.16(o)]</p>	<p>H2S: Recordkeeping by manual logging of parameter or storing data in a computer data system upon occurrence of event for each monitoring event.</p> <p>A. For monitoring events, the following parameters shall be recorded: Date, Time, Name of Persons conducting monitoring, Wind Speed, Wind Direction, Location of Measurement and H2S concentrations. B. OCLC shall record the date and time of the activation of the Corrective Action Plan. C. OCLC shall record the date and time of the commencement of the excavation of any new phase.</p> <p>All records shall be kept in a permanently bound log book or readily accessible computer memories acceptable to the Regional Enforcement Office. [N.J.A.C. 7:27-22.16(a)]</p>	<p>Submit notification: As per the approved schedule. As soon as H2S concentration of 30 ppbv or greater is detected, the designated Emergency Co-coordinator Supervisor (ECS) shall implement the Corrective Actions Plan described in OCLC's Health and Safety Plan.</p> <p>If the corrective actions undertaken cannot decrease H2S below 0.03 ppmv within four hours, or OCLC cannot demonstrate to the Department's satisfaction that OCLC is not the source of the H2S within thirty minutes, all activities related to excavation shall cease.</p> <p>The ECS shall continue to take corrective measures until the H2S concentration is below 30 ppbv. OCLC shall immediately notify the Department's Hotline at 1-(877)-WARNDP upon any exceedances of the 30 ppbv Action Limit and/or upon the activation of the Corrective Action Plan.</p> <p>OCLC shall notify the Department's Hotline at 1-(877)-WARNDP 24 hrs prior to changing the frequency of periodic monitoring events and/or the excavation of any new phase. [N.J.A.C. 7:27-22.16(a)]</p>

7	The permittee shall implement a Dust Management Plan as follows: 1. Utilize the existing Dust control requirements at Attachment A of the Operations and Maintenance Manual. 2. Take corrective actions as needed; 3. Monitor visual impacts 3. The personnel must be provided with the checklist of all items to be inspected, inspection procedures, dust management procedures, and corrective actions for expected malfunctions. 4. The Plan and record of any corrective actions shall be kept on site and made available to the Department personnel upon request. 5. The permittee shall follow visual opacity inspections requirements listed in this permit under OS Summary. [N.J.A.C. 7:27-22.16(a)]	None.	Recordkeeping by manual logging of parameter or storing data in a computer data system once per calendar day during operation. The parameters recorded shall include the completed inspection checklist and corrective actions, if any. The checklist shall include the date and time and the name and position of the person completing the checklist and be signed by that person. [N.J.A.C. 7:27-22.16(a)]	Submit notification: Every week if corrective actions were taken. The Department may modify the Dust Management Plan, and the modification shall be implemented by the permittee within seven (7) days of the Department's notification. [N.J.A.C. 7:27-22.16(a)]
8	OPACITY: The permittee shall not use the equipment in a manner which will cause visible emissions (exclusive of condensed water vapor) beyond the site property line, verified by the operator. If visible emissions are observed, the Permittee shall implement dust control requirements section 6.4.1 of the Operations and Maintenance Manual for OCLF. [N.J.A.C. 7:27-22.16(a)]	Monitored by visual determination daily. The Permittee shall conduct visual opacity inspections during daylight hours while the source is operating. The individual conducting the daily opacity inspections does not need to be a certified opacity reader. [N.J.A.C. 7:27-22.16(o)]	None.	Using Dust Control plan Attachment B Comply with the requirement: Upon occurrence of event. [N.J.A.C. 7:27-22.16(a)]
9	TSP <= 0.76 tons/yr for Screener 2a and engine based on 3120 hours per year. [N.J.A.C. 7:27-22.16(a)]	TSP: Monitored by calculations annually based on actual hours/fuel used in Engine and soil processing rate and emissions factor used in the application. [N.J.A.C. 7:27-22.a]	None.	None.

[N.J.A.C. 7:27-22.16(a)]	None.	None.
13	SO2: The emission rate is below the reporting threshold of 0.05 lb/hr in Appendix to N.J.A.C. 7:27-22. [N.J.A.C. 7:27-22.16(a)]	None.	None.	None.
14	VOC (Total): The emission rate is below the reporting threshold of 0.05 lb/hr in Appendix to N.J.A.C. 7:27-22. [N.J.A.C. 7:27-22.16(a)]	VOC (Total): Monitored by calculations annually based on actual hours/fuel use in Engine and processing rate and emissions factor used in the application. [N.J.A.C. 7:27-22.16(a)]		
15	Owners and operators of stationary CI internal combustion engines must operate and maintain stationary CI ICE that achieve the emission standards as required in 40 CFR 60.4204 over the entire life of the engine. [40 CFR 60.4206]	Other: The owner or operator shall review the emission-related manufacturer's written instructions or procedures developed by the owner or operator that are approved by the engine manufacturer. [40 CFR 60.4206].	Other: The owner or operator shall keep the manufacturer's emission-related written instructions or procedures developed by the owner or operator that are approved by the engine manufacturer, over the entire life of the engine. If the manufacturer's emission-related written instructions are not followed, the owner or operator must keep the results of the performance test(s) demonstrating compliance with the applicable emission limits. [40 CFR 60.4206].	None.
16	Beginning October 1, 2010, the CI internal combustion engines with a displacement of less than 30 liters per cylinder subject to 40 CFR 60 Subpart IIII (manufactured after April 1, 2006 or modified or reconstructed after July 11, 2005) that use diesel fuel must use diesel fuel that meets the requirements of 40 CFR 80.510(b) subject to the following per gallon standards: 15 ppm (0.0015 percent) maximum sulfur content and either a minimum cetane index of 40 or a maximum aromatic content of 35 volume percent, except that any existing diesel fuel purchased (or otherwise obtained) prior to October 1, 2010, may be used until depleted. [40 CFR 60.4207(b)]	Monitored by review of fuel delivery records once per bulk fuel shipment. For each diesel fuel delivery received, the owner or operator shall review written documentation of the delivery to ensure the maximum allowable fuel oil sulfur content and either a minimum cetane index or a maximum aromatic content is not being exceeded. Such written documentation can include, but is not limited to: bill of lading, delivery invoice, or certificate of analysis. [N.J.A.C. 7:27:22.16(o)] or [N.J.A.C. 7:27- 8.13(a)]	Recordkeeping by invoices / bills of lading / certificate of analysis once per bulk fuel shipment. The owner or operator shall keep records of fuel used showing oil sulfur content and either a minimum cetane index or a maximum aromatic content for each delivery received. All records must be maintained for a minimum of 2 years following the date of such records per 40 CFR 60.7(f). [N.J.A.C. 7:27:22.16(o)] or [N.J.A.C. 7:27- 8.13(a)]	None.

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
17	Owners and operators of a stationary CI internal combustion engine equipped with a diesel particulate filter must install a backpressure monitor that notifies the owner or operator when the high backpressure limit of the engine is approached. [40 CFR 60.4209(b)]	Monitored by pressure measurement device continuously. The backpressure monitor must alert the operator when the diesel particulate filter requires service. The service monitor should be mounted in a location that is clearly visible to the operator during operation. [40 CFR 60.4209(b)]	Recordkeeping by manual logging of parameter or storing data in a computer data system upon occurrence of event. The owner or operator must keep records of any corrective action taken after the backpressure monitor has notified the owner or operator that the high backpressure limit of the engine is approached. [40 CFR 60.4214(c)]	None.
18	The owner or operator of a 2007 model year and later stationary CI internal combustion engine with a displacement of less than 30 liters per cylinder complying with the emission standards specified in 40 CFR 60.4204(b), must comply by purchasing an engine certified to the emission standards in 40 CFR 60.4204(b) as applicable, for the same model year and maximum engine power. The engine must be installed and configured according to the manufacturer's emission-related specifications. If the owner/operator does not install, configure, operate, and maintain the engine and control device according to the manufacturer's emission-related written instructions, or you change emission related settings in a way that is not permitted by the manufacturer, you must demonstrate compliance as prescribed in 40 CFR 60.4211(g). [40 CFR 60.4211(c)]	Other: The owner or operator must review documentation once initially from the manufacturer that the engine is certified to meet the emission standards as applicable, for the same model year and maximum engine power. [40 CFR 60.4211(c)].	Other: The owner or operator must keep documentation for the life of the equipment from the manufacturer that the engine is certified to meet the emission standards as applicable, for the same model year and maximum engine power. [40 CFR 60.4211(c)].	None.
19	A new or reconstructed stationary RICE located at an area HAP source must meet the requirements of 40 CFR 63 by meeting the requirements of 40 CFR 60 Subpart IIII, for compression ignition engines or 40 CFR 60 Subpart JJJJ, for spark ignition engines. No further requirements apply for such engines under 40 CFR 63. [40 CFR 63.6590(c)]	Other: Comply with all applicable provisions at NSPS IIII. [40 CFR 63].	Other: Comply with all applicable provisions at NSPS IIII. [40 CFR 63].	None.

16	Changes in time periods for submittal of information and postmark deadlines set forth in this subpart, may be made only upon approval by the Administrator and shall follow procedures outlined in 40 CFR Part 60.19 (NSPS Subpart A). [40 CFR 60.19]	None.	None.	None.
17	Owners and operators of stationary CI internal combustion engines must operate and maintain stationary CI ICE that achieve the emission standards as required in 40 CFR 60.4204 and 60.4205 over the entire life of the engine. [40 CFR 60.4206]	None.	Other: The owner or operator shall keep the manufacturer's emission-related written instructions over the entire life of the engine. [40 CFR 60.4206].	None.

BOP160002

**New Jersey Department of Environmental Protection
Facility Specific Requirements**

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
18	Beginning October 1, 2010, the CI internal combustion engines with a displacement of less than 30 liters per cylinder subject to NSPS IIII (manufactured after April 1, 2006 or modified or reconstructed after July 11, 2005) that use diesel fuel must use diesel fuel that meets the requirements of 40 CFR 80.510(b) that contains the following per gallon standards: 15 ppm (0.0015 percent) maximum sulfur content and either a minimum cetane index of 40 or a maximum aromatic content of 35 volume percent, except that any existing diesel fuel purchased (or otherwise obtained) prior to October 1, 2010, may be used until depleted. [40 CFR 60.4207(b)]	Monitored by review of fuel delivery records once per bulk fuel shipment. For each diesel delivery received, the owner or operator shall review written documentation of the delivery to ensure the maximum allowable fuel oil sulfur content and either a minimum cetane index or a maximum aromatic content is not being exceeded. Such written documentation can include, but is not limited to: bill of lading, delivery invoice, certificate of analysis. [N.J.A.C. 7:27-22.16(o)]	Recordkeeping by invoices / bills of lading / certificate of analysis once per bulk fuel shipment. The owner or operator shall keep records of fuel showing oil sulfur content and either a minimum cetane index or a maximum aromatic content for each delivery received. All records must be maintained for a minimum of 2 years following the date of such records per 40 CFR 60.7(f). [N.J.A.C. 7:27-22.16(o)]	None.
19	The owner or operator that must comply with the emission standards specified in NSPS IIII must operate and maintain the stationary CI internal combustion engine and control device, except as permitted under 40 CFR 60.4211(g), according to the manufacturer's emission-related written instructions. In addition, owners and operators may only change emission-related settings that are permitted by the manufacturer. The owner or operator must also meet the requirements of 40 CFR parts 89, 94 and/or 1068, as applicable (NSPS Subpart IIII). [40 CFR 60.4211(a)]	None.	Other: The owner or operator shall keep the manufacturer's emission-related written instructions. [40 CFR 60.4211].	None.

BOP160002

**New Jersey Department of Environmental Protection
Facility Specific Requirements**

Ref.#	Applicable Requirement	Monitoring Requirement	Recordkeeping Requirement	Submittal/Action Requirement
20	Emergency generators may be operated for the purpose of maintenance checks and readiness testing limited to 100 hours per year, provided that those tests are recommended by Federal, State, or local government, the manufacturer, the vendor, or the insurance company associated with the engine. Anyone may petition the Administrator for approval of additional hours to be used for maintenance checks and readiness testing, but a petition is not required if the owner or operator maintains records indicating that Federal, State, or local standards require maintenance and testing of emergency ICE beyond 100 hours per year (NSPS Subpart IIII). [40 CFR 60.4211(f)]	Monitored by hour/time monitor continuously. The owner or operator of an emergency stationary internal combustion engine that does not meet the standards applicable to non-emergency engines must install a non-resettable hour meter prior to startup of the engine. [40 CFR 60.4209(a)]	Recordkeeping by manual logging of parameter or storing data in a computer data system upon occurrence of event. The owner or operator must record the time of operation of the emergency engine and the reason the engine was in operation during that time. Starting with the model year 2011, 2012, or 2013, depending on the maximum engine power as provided in Table 5 in NSPS IIII, the owner or operator must keep records of the operation of the engine in emergency and non-emergency service that are recorded through the non-resettable hour meter if the emergency engine does not meet the standards in 40 CFR 60.4204, applicable to non-emergency engines, in the applicable model year. The emergency engine must comply with the labeling requirements in 40 CFR 60.4210(f). [40 CFR 60.4214(b)]	None.
21	A new or reconstructed stationary RICE located at an area HAP source must meet the requirements of 40 CFR 63 by meeting the requirements of 40 CFR 60 subpart IIII, for compression ignition engines or 40 CFR 60 subpart JJJJ, for spark ignition engines. No further requirements apply for such engines under 40 CFR 63. (MACT ZZZZ) [40 CFR 63.6590(c)]	Other: Comply with all applicable provisions at NSPS IIII. [40 CFR 63].	Other: Comply with all applicable provisions at NSPS IIII. [40 CFR 63].	None.
22	The owner or operator of a 2007 model year and later emergency generator with a displacement of < 10 liters per cylinder and a maximum engine power ≥ 37 kW (HP ≥ 50) and no greater than 3,000HP ($\leq 2,237$ kW) must comply with the certification emissions standards in 40 CFR 89.112 and smoke standards in 40 CFR 89.113 for the same model year and maximum engine power as follows: NMHC + NO _x ≤ 4 g/kW-hr, CO ≤ 3.5 g/kW-hr, PM ≤ 0.2 g/kW-hr, weighted average emissions as defined in 40 CFR 89.404. (NSPS Subpart IIII). [40 CFR 60.4205(b)]	None.	Other: The owner or operator of a 2007 model year or later engine must keep manufacturer certification showing compliance with the applicable emission standards, for the same model year and maximum engine power. [40 CFR 60.4211].	None.

23	The owner or operator of a 2007 model year and later stationary CI internal combustion engine complying with the emission standards specified in 40 CFR 60.4205(b), must comply by purchasing an engine certified to the emission standards in 40 CFR 60.4205(b), for the same model year and maximum engine power. The engine must be installed and configured according to the manufacturer's emission-related specifications (NSPS Subpart IIII). [40 CFR 60.4211(c)]	None.	Other: The owner or operator must keep documentation from the manufacturer, for the life of the equipment, that the engine is certified to meet the emission standards as applicable, for the same model year and maximum engine power. If the engine and control device is not installed, configured, operated, and maintained according to the manufacturer's emission-related written instructions, or emission-related settings are changed in a way that is not permitted by the manufacturer, the owner or operator must demonstrate compliance as prescribed at 40 CFR 60.4211(g)(1), (2) or (3) depending on the maximum engine power. [40 CFR 60.4211(c)].	None.

78931 OCEAN CNTY LANDFILL CORP BOP160002 E9 (Storage Vessel)
Print Date: 2/9/2018

What type of contents is this storage vessel equipped to contain by design?

Liquids Only

Storage Vessel Type:

Tank

Design Capacity:

1,000,000

Units:

gallons

Ground Location:

Above Ground

Is the Shell of the Equipment

Yes

Exposed to Sunlight?

Shell Color:

Other

Description (if other):

fused ceramic, cobalt blue

Shell Condition:

Paint Condition:

Good

Shell Construction:

Is the Shell Insulated?

No

Type of Insulation:

Insulation Thickness (in):

Thermal Conductivity of Insulation [(BTU)(in)(hr)(ft²)(deg F)]:

Shape of Storage Vessel:

Cylindrical

Shell Height (From Ground to Roof Bottom) (ft):

23.00

Length (ft):

Width (ft):

Diameter (ft):

87.00

Other Dimension

Description:

base below normal groundlevel

Value:

11.00

Units:

feet

Fill Method:

Top Pipe

Description (if other):

Maximum Design Fill Rate:

104.00

Units:

gal/min

Does the storage vessel have a roof or an open top?

Roof

Roof Type:

Domed vertical fixed roof tank

Roof Height (From Roof Bottom to Roof Top) (ft):

10.00

Roof Construction:

Primary Seal Type:

Secondary Seal Type:

Total Number of Seals:

Roof Support:

Does the storage vessel have a Vapor Return Loop?

No

Does the storage vessel

78931 OCEAN CNTY LANDFILL CORP BOP160002 E9 (Storage Vessel)

Print Date: 2/9/2018

Does the storage vessel
have a Conservation Vent?

Have you attached a diagram
showing the location and/or the
configuration of this equipment?

Have you attached any manuf.'s
data or specifications to aid the
Dept. in its review of this
application?

Comments:

78931 OCEAN CNTY LANDFILL CORP BOP160002 E10 (Storage Vessel)
Print Date: 2/9/2018

What type of contents is this storage vessel equipped to contain by design?

Liquids Only

Storage Vessel Type:

Reservoir

Design Capacity:

35,000

Units:

gallons

Ground Location:

Above Ground

Is the Shell of the Equipment

Exposed to Sunlight?

Shell Color:

Description (if other):

Shell Condition:

Paint Condition:

Shell Construction:

Is the Shell Insulated?

Type of Insulation:

Insulation Thickness (in):

Thermal Conductivity of Insulation [(BTU)(in)(hr)(ft²)(deg F)]:

Shape of Storage Vessel:

Rectangular

Shell Height (From Ground to Roof Bottom) (ft):

Length (ft):

48.00

Width (ft):

12.00

Diameter (ft):

Other Dimension

Description:

height

Value:

9.00

Units:

feet

Fill Method:

Submerged

Description (if other):

Maximum Design Fill Rate:

104.00

Units:

gal/min

Does the storage vessel have a roof or an open top?

Roof

Roof Type:

Internal floating roof tank

Roof Height (From Roof Bottom to Roof Top) (ft):

0.25

Roof Construction:

Primary Seal Type:

Secondary Seal Type:

Total Number of Seals:

Roof Support:

Does the storage vessel have a Vapor Return Loop?

Does the storage vessel

78931 OCEAN CNTY LANDFILL CORP BOP160002 E10 (Storage Vessel)

Print Date: 2/9/2018

Does the storage vessel
have a Conservation Vent?

Have you attached a diagram
showing the location and/or the
configuration of this equipment?

Have you attached any manuf.'s
data or specifications to aid the
Dept. in its review of this
application?

78931 OCEAN CNTY LANDFILL CORP BOP140001 CD3 (Particulate Filter (Other))
Print Date: 1/12/2015

Make:	LFG Specialties, Inc.
Manufacturer:	OWT/LFG Specialties
Model:	EF 1045 I 12
Type:	Enclosed
Minimum Residence Time (sec):	0.9
Maximum Rated Gross Heat Input (MMBtu/hr):	100
Auxilliary Fuel:	Propane
Method of Pilot Flame Monitoring:	Thermocouple and UV flame detector
Monitoring Location:	at 40' elevation
Automatic Gas Shutoff After Loss of Flame?	Yes
Automatic Reignition After Loss of Flame?	Yes, after cooldownperiod indicated by main flame thermocouple
Minimum Gas Flow Rate (acfm):	500
Minimum Operating Temperature (deg F):	1500
Minimum Heat Content at Burner Tip (Btu/ft3):	300
Flare Operation Type:	Enclosed
Does Flare have smokeless design?	Yes
Is Flare equipped with flame retainer?	Not applicable (Stack encloses flare)
Is Flare equipped with flame arrestor?	Yes
Is Flare equipped with LEL monitor?	No
Flare Stack Diameter (inches):	120
Lower Heat Content of source gas (BTU/scf):	350

Lower Heat Content of supplemental Fuel (BTU/scf): 1000

Destruction and Removal Efficiency (%): 98

How was Efficiency determined? Manufacturer Design

Maximum Number of Sources Using this Apparatus as a Control Device (Include Permitted and Non-permitted Sources): 8

Alternative Method to Demonstrate Control Apparatus is Operating Properly: None

Have you attached data from recent performance testing? No

Have you attached any manufacturer's data or specifications in support of the feasibility and/or effectiveness of this control apparatus? Yes

Have you attached a diagram showing the location and/or configuration of this control apparatus? Yes

Comments:

Make:	LFG Specialties, Inc.
